SUMMARY

Full-stack software engineer with 4+ years shipping production systems in C#/.NET and TypeScript/React/Astro.

TECHNICAL SKILLS

- Languages & Frameworks: C#, .NET / .NET Core, TypeScript, JavaScript, React, Node.js, ASP.NET MVC, Python, Go, Elixir, Lua
- Data & Databases: SQL Server, SQLite, ETL Pipelines, Data Modeling, Business Intelligence, Power BI
- Practices & Tools: REST APIs, Test-Driven Development, CI/CD, Git, GitHub Actions, Docker, Agile, Asynchronous Programming, Object-Oriented & Functional Programming, Performance Optimization, System Integration

EXPERIENCE

Display Pack INC | Software Engineer Jan 2025 — Present

C# | .NET Core | SQL Server | ASP.NET MVC | TypeScript/JavaScript | Microsoft AX

- Built and maintained full-stack .NET Core/TypeScript applications used by 350+ employees, increasing operational throughput by 20%+.
- Led development of enterprise applications including a document management system, employee review software, ETL pipelines, a push notification system, and unit-tested REST APIs.
- Integrated PLC and ERP (Microsoft AX) data pipelines to automate manual processes, saving 2+ hours per week in cross-team handoff time.
- Applied test-driven development across new features, reducing post-deployment defects by 40%.
- Replaced legacy Power BI and SSRS dashboards for executive reporting, improving data refresh latency by 60% and reducing maintenance overhead.

The Right Place, Inc. | Software Developer & Business Intelligence Analyst Jun 2022 — Jun 2023

React.js | JavaScript | SQL | PHP | Tableau | Python

- Started as an intern; built and launched mitalent360.com (React, SQL, PHP) in 4 months to support regional workforce and talent-search initiatives.
- Delivered three economic research reports using Tableau and Python, referenced in local news and industry publications.
- Collaborated with public and private stakeholders on software and analytics projects informing regional economic development strategy.

University of Michigan - NERS | Research Contractor

Jan 2022 — Aug 2022

R | SAS | Regression Modeling | Statistical Analysis

- Performed econometric and statistical modeling on U.S. nuclear energy policy using R and SAS, contributing to a 40-page departmental research report.

EDUCATION

Grand Valley State University

Grand Rapids, Michigan

Bachelor of Science in Economics, Minor in Philosophy

2019 — 2022
